Promoting Diversity: Use City Tours, Workshops, and Talks as tools for a more inclusive corporate culture

The colonial past shapes our cities – from street names to architectural relics. It influences not only public spaces but also economic structures, trade relations, and corporate culture.

Our decolonial city tours enable companies to critically engage with this history and its impact. Tours, workshops, and talks raise awareness of diversity, foster a reflective historical consciousness, and contribute to a more inclusive corporate culture. This lays the foundation for sustainable change.

Possible occasions

Whether for Black History Month, Pride Month, International Womxn's Day, International Weeks Against Racism, summer/Christmas parties, or the next company outing – book us and grow together as a team through this unforgettable experience.
